If you have specific questions about a feature or need additional information, we encourage you to call us at 402.861.8800 or email us at info@proware-cpa.com.

What is Amortization Plus?

Amortization Plus, or A+ for short, is a tool to help create and maintain loan amortization, annuity, and lump-sum distribution schedules for clients and companies that you can setup in the program. You can calculate interest rates, terms, payments, payouts, and print schedules for the life of a loan or annuity. In addition, you can make balloon payments, change terms, withdraw lump-sums, or change any other facet of a loan or annuity. In addition to printing schedules, you can also graph and chart loan and annuity information and even print a 5-year loan analysis schedule to include for financial statement reporting. Set up as many companies as you like and for each company set up as many loans and annuities for them.

Features

The following are some of the most significant features you will find in Amortization Plus:

- Create and maintain an unlimited number of companies
- For each company or client create an unlimited number of loan and annuity schedules
- Calculate interest rates, terms, payment amounts, payouts, principal amounts, and future value amounts for loans and annuities
- Make balloon payments, lump-sum distributions, or change terms of any loan or annuity
- Print loan and annuity schedules including a 5-Year loan analysis for financial statement reporting
- Graph the terms of any loan or annuity
- Help and Tutorials to guide you through the creation of clients and entering loan and annuity data

Amortization Plus will become indispensable as you begin to utilize the many customizable features for your clients. You can quickly enter loan information to get a payment or interest rate on the fly using the "Quick Schedule" option, and then save the results for any client already setup in A+. From there, you can print loan amortization schedules, annuity schedules, and even graph the results. Once you see how easy and intuitive Amortization Plus is to use, you will never use another loan amortization program.

Try A+ now and you will easily see the benefits. It will save you time and money, giving you the most professional results for your clients or for your own company!
