

Compatible with Windows XP, Vista, and Version 7!

# RATIOS PLUS

Priced at just \$99.00 for single-user and \$199 for unlimited, multi-user license!

## What is Ratios Plus?

Ratios Plus is a full-featured program designed by CPA's for accounting and finance professionals. Introduced in 2004, Pro-Ware's Ratio's Plus (RP) allows you to easily enter any financial information from a balance sheet or income statement to produce any financial ratio for a company. Once you select the various ratios to calculate and print, RP provides easy data entry for financial statement data required for specific ratios. In addition, you can create up to 10 user-defined ratios and even create your own data fields for fully-customizable financial ratios. Ratios Plus is the easiest and most flexible software program available for determining a company's financial viability.

Pro-Ware has provided accountants and other professionals with quality software that distinguishes itself from other accounting software that you may have used or are currently using in your company. Ratios Plus was designed with you, the professional, in mind, all at a very reasonable price.

Ratios Plus provides maximum utility and flexibility for determining a company financial strength and weaknesses through the use of activity, liquidity, debt and capital structure, and profitability ratios. With RP, you can maintain up to 10 years of financial data to compare ratios on a year-to-year or even a month-to-month basis.

Ratios Plus also allows you to create user-defined fields for entering unique, non-standard accounting data. In addition, you can create your own user-customizable ratios by simply indicating which pieces of accounting data to compare. The ratios can be as complex as you need them to be, utilizing any accounting data or user-defined data as needed.

You can enter as little or as much accounting data as you need by indicating in advance exactly which ratios you need to print. RP instantly tells you what information is needed for any ratios that you have selected, making data entry easy and flexible.

Track annual and monthly ratio information for any financial ratio. You can enter historic information for up to 10 prior years and keep current and future ratio information for as many as 10 years. Whether you are an accountant in private practice, controller of a large corporation, or somewhere in-between, Ratios Plus has the flexibility and features you require in a financial ratio software program. RP is the right choice, regardless of your reporting requirements or level of expertise and is far easier to use and more intuitive than other financial ratio. Don't take our word for it, try Ratios Plus free for 30 days and see for yourself!

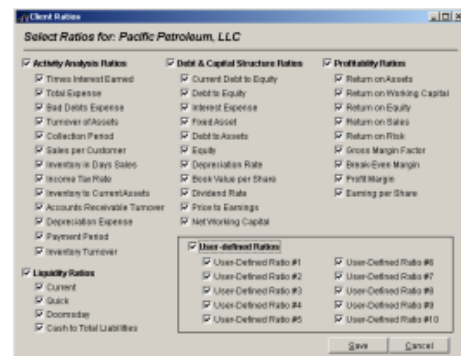

## Our Technical Support

Whenever the need arises, our technical support line is there to help you. You can visit our discussion board on the website to find answers to questions posted by other users.

Try Ratios Plus today and you'll see that we provide the best technical support available. It's unlimited and at no additional cost to you. We support the software we sell and will work hard to answer your questions and resolve technical issues right away so you can continue on with your work.

In addition, you won't experience long hold times or wait endlessly for callbacks because our technicians are trained to handle most problems quickly and correctly the first time!

**Our technical support is always included at no additional cost!!**
